Dear Burmaa

Letter of Support for the Organising Committee of the International Year of Rangelands and Pastoralists

Thank you for your letter regarding the work of the International Year of Rangelands and Pastoralists.

At Pasture for Life we are passionate about the restoration of ecosystems and implementing positive change in our food and farming systems. We have many supporters and learn from farmers/support those on their journey to farm 100% pasture fed systems.

We are very keen to support your initiative and engage with the IYPRP Supporting Group. The promotion of sustainable rangeland management and the impact this will have on communities is something that we collectively support and wish to raise awareness of this crucial issue.

Yours sincerely

A handwritten signature in black ink that reads "Jimmy Woodrow". The signature is written in a cursive, flowing style.
