

# VIRTUAL TOURS

## BENEFITS

- Increased accessibility
- Extended educational experience
- Self-driven and self-paced
- Asynchronous learning with online presence
- Offline resources provide interactive exploration and instruction
- Digitizes the world
- Once the digitization is complete, there are endless options for continued development

## CHALLENGES

- High cost of hardware
- Development complexity and connectivity requirements
- Learning curve for initial use and future adoption of technology
- Evaluation and impact measurement

### *Dynamic Engagement*

Virtual tours provide a rich multi-media experience that can incorporate videos, images, text, and links to external resources.

Tours created are available on-demand, highly interactive, and new content can be created if it does not already exist.

Opportunities to use as part of interactive education, training, sharing knowledge, and community engagement.

### **Take a virtual tour**
